Mini Samurai Decor.

This time, I'm offering you a miniature Samurai figurine. You can freely enlarge or delicately reduce its size, while keeping in mind that to preserve all the details, maintain the layer height at **0.1mm-0.14mm**. If you really want the figurine to print as it appears in my photos, give it the time it needs :)

Another matter is the **supports**. This time, it won't be as easy as with my other models. There's no soft play here. You'll really need to approach their removal with patience and the right tools. It will be worth it. (see the last photo)

Printed with Fuzzy Skin effect.

Fuzzy Skin: All walls
Fuzzy Skin Point Distance: 0.4
Fuzzy Skin thickness: 0.2

Cheers and happy printing!

All my photos are real and show an actual 3D-printed figure photographed by me.

With more and more questions popping up about the commercial use of my models, I've set up a special page on Patreon to make it easier for you to do just that! <https://patreon.com/29flo>
